DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Amir et al. (2004/0198398).

Regarding claims 1-4, 8, 12-15, 18-19, Amir discloses a system and method for detecting proximity between mobile device users comprising: a client application on said device communicating across a wireless network, the client application comprising a plurality of software objects (see fig.1, elements 15, 25, paragraph [0036] and description); and an awareness server consisting of a plurality of server objects that monitors multiple devices on a wireless communication network (see fig.1, elements 15 25 paragraphs [0036]-[0038] and description).

Regarding claim 5, 11, 16, Amir further discloses wherein said plurality of software objects of said client application comprises and alerter object wherein said alerter object triggers a plurality of notifications to alert a user of said device of proximity to another device (see fig.1, elements 15, 25 paragraphs [0040] and description).

Art Unit: 2683

Regarding claims 6-7, 9-10, Amir further discloses wherein said plurality of software objects of said client application comprises an updater object wherein said updater object provides an update of network location via a transmitter of said device to the wireless network and the awareness server (see fig.1, elements 15, 25 paragraph [0007] and description).

Regarding claim 17, the Examiner takes Official notice that these features is notoriously well known in the telecommunication device art.

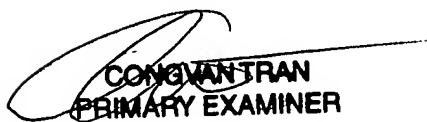

Regarding claims 20-21, Amir discloses a system and method for detecting proximity between mobile device users comprising of the steps: finding location status of device; reporting device status and location update to awareness server; monitoring ID list on awareness server; matching devices in a similar location on awareness server; and sending out awareness notification to matching devices indicating device proximity on awareness server (see abstract, paragraphs [0001-0014], fig.1 elements 15, 25 and description).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CongVan Tran whose telephone number is 571-272-7871. The examiner can normally be reached on Monday-Thursday.
